

Product Lifecycle Management:

technical support & project management

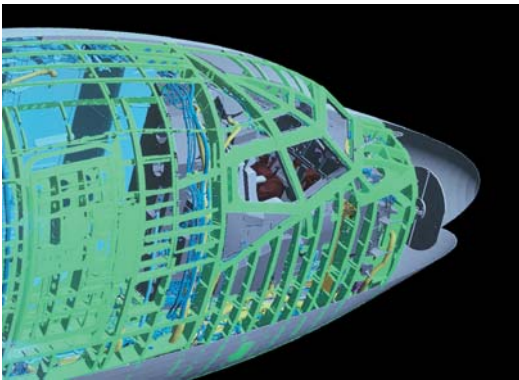

Product Data Management

Digital Mock Up

Product Lifecycle Management

PLM is an important tool in enterprise & information strategy. Organisations can digitally manage product information from concept to retirement, allowing unified, information driven decisions at every stage of the lifecycle.

REP provides consultation, engineering and training support to its customers at every stage of the product lifecycle – a complete product data management solution.

REP understands the growing need to introduce a PLM tool into your business to help manage the increasing amount of data that today's design programs require.

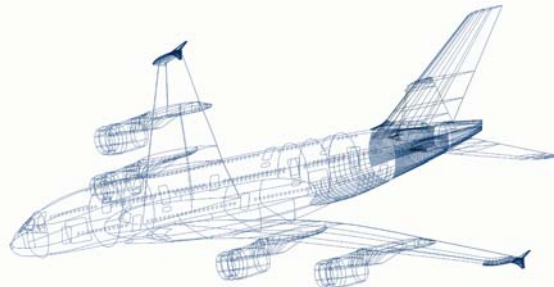

With this in mind, together with the variety of different tools currently on the market, REP offers you the support required to identify, configure and implement the right PLM solution that suits you.

Digital Mock Up (DMU)

As part of our service offering, we have a multi-role DMU (Digital Mock Up) team providing support to our clients which include Airbus and their major suppliers across all areas of the aircraft wing. This includes both structures and electrical systems.

The disciplines covered by REP teams include:

- Zone Control
- Clash Detection / Vaulting
- Help Desk / PDM Support
- Training
- Consultancy
- Project Management
- On-site Support and Training

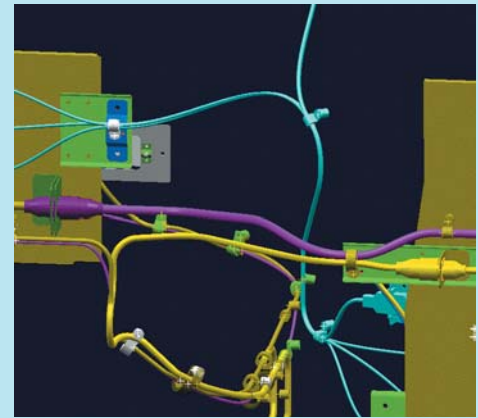

TeamCentre

REP has direct links with Siemens and its partners to develop a series of services to help its customers.

Software

REP currently support numerous software programs to facilitate our various clients work including:

- Windchill
- TeamCentre V.P.M.
- Smarteam
- PRIMES (AIRBUS)
